Enosh Godbole

Electrical Engineer

Pune, Maharashtra, India

Summary

Hello! this is enosh third-year Electrical Engineering student with a passion for designing and implementing complex electrical systems. With hands-on experience in Electrical simulation, AutoCAD, Matlab, PCB design, Python, and C++, I am equipped with the skills needed to bring innovative ideas to life.

In my previous work, I was part of a project team that designed and built a formula style race car from scratch. My role in the project was to develop the electrical system, including the design of the printed circuit board (PCB), programming the microcontroller, and simulating the performance of the system using software such as AutoCAD and Matlab. Through this project, I developed a keen eye for detail, as well as strong problem-solving skills.

In addition to my project work, I have also completed coursework in power electronics, control systems, and digital signal processing. I have also honed my programming skills through coursework and personal projects, including the development of a control system for a quadcopter using Python and C++.

I am excited about the possibilities of working in the field of Electrical Engineering and look forward to applying my skills and knowledge to create innovative solutions. If you are interested in learning more about my background and experience, please do not hesitate to reach out to me.

Experience

Clarion Organics

Intern

January 2023 - February 2023 (2 months)

Maharashtra, India

Learn & Work on the basics of Control & Power wiring

Education

Dr. D. Y. Patil Institute of Technology, Pimpri, Pune

Bachelor of Engineering - BE, Electrical Engineering · (February 2020 - March 2024)
